EXECUTIVE SUMMARY

AI & Data Science undergraduate with a builder's mindset — focused on turning data and code into real, usable solutions. Comfortable working across the full stack, from data analysis and machine learning to backend development and deployment. Disciplined, fast-learning, and consistently driven by outcomes over theory. Actively building toward a career in AI Full Stack Development, Data Science, and Business Intelligence at MNC level.

EXPERIENCE

Sales & Operations Assistant

Kanmani Readymades

April 2022 – Present, Madurai, Tamilnadu

- Managed customer interaction, billing, and inventory handling in a family-owned retail shop.
- Took responsibility for daily operations by assisting the store manager/owner, ensuring smooth workflow and quick decision-making.
- Handled busy hours independently, improving customer satisfaction and operational efficiency.

AI Full Stack Application Development Intern

Gevinst Technologies

December 2025 – January 2026, Chennai, Tamil Nadu, India (Hybrid)

- Designed and developed an AI-powered Digital Library application converting PDF, DOCX, and TXT documents into natural-sounding speech using Python and TTS integration.
- Built robust file upload, document parsing, and content extraction pipelines supporting multiple file formats.
- Integrated AI-based text-to-speech functionality, delivering clear and intelligible voice output from uploaded documents.
- Worked on backend logic, API integration, and modular application design following professional development standards.
- Gained hands-on exposure to AI application workflows, debugging, and collaborative development in a hybrid work environment.

AI Intern

Microsoft Elevate (AICTE & Edunet Foundation)

December 2025 – January 2026, India (Remote)

- Built an executive-level Power BI dashboard using Global Superstore data, analyzing KPIs, regional performance, profitability trends, and loss-making products for business decision-making.
- Developed an end-to-end ML solution for Walmart Weekly Sales Prediction using Python and scikit-learn, training a Random Forest Regressor on 421,000+ records, significantly outperforming Linear Regression baseline.
- Contributed to Academic Compass, an AI-driven academic risk intelligence system that predicts student risk levels and delivers explainable recommendations through a modern dashboard.
- Applied machine learning, business intelligence, and Microsoft Azure fundamentals in an industry-aligned internship environment.

Data Scientist

Vinsup Infotech (P) LTD(Intern)

July 2025 – August 2025, Madurai, Tamilnadu

- Assisted in cleaning, preprocessing, and analyzing datasets to support real-time project requirements.
- Worked with Python, Pandas, and Machine Learning algorithms to build basic predictive models.
- Generated insights from data and contributed to the preparation of project reports and visualizations.
- Collaborated with mentors and team members to understand real industry workflows and improve problem-solving skills.

PROJECT

SRM Relay (Campus Communication App)

SRM Madurai College For Engineering And Technology

- Built a role-based communication app (Principal, VP, HOD, Staff) with secure authentication, admin dashboard, persistent inbox, and audio message playback. Implemented role-based permissions and stable database storage.
- Awarded certificate by the college principal.
- Tech: Flutter, Firebase Authentication, Firebase Firestore, Role Management, DB Persistence.

Smart Health Prediction System using Machine Learning

- Developed a disease-prediction model using RandomForest on 55+ diseases and deployed using Streamlit.
- Added a doctor_info module with precautions and remedies for user guidance.
- Tech: Python, scikit-learn, Streamlit.

Kanmani Readymades – Business Website Development

Kanmani Readymades • February 2026 – February 2026

- Built and deployed a fully responsive business website for a family-owned retail clothing store to establish digital presence and improve customer accessibility.
- Designed modern UI with mobile, tablet, and desktop responsive layouts, product showcase sections, and business story integration.
- Integrated contact and inquiry functionality, enabling direct customer engagement through the website.
- Deployed on Vercel with performance optimization for fast loading and reliable uptime.

Consultant-Level Business Insights Dashboard

Microsoft Elevate (AICTE & Edunet Foundation) • January 2026 – February 2026

- Designed an executive-level Power BI dashboard using the Global Superstore dataset, analyzing KPIs, profitability trends, and regional sales performance.
- Built dynamic visualizations to identify loss-making products and underperforming segments, enabling data-driven business decision-making.
- Applied consultant-level thinking to structure insights for business stakeholders rather than technical audiences.
- Demonstrated end-to-end BI workflow — data cleaning, data modeling, DAX measures, and visual storytelling.

Digital Library App

Gevinst Technologies • December 2025 – January 2026

- Developed a production-ready application to convert documents into audio for accessible content consumption.
- Built a Flutter frontend and FastAPI backend, deployed on cloud infrastructure.
- Implemented asynchronous processing for efficient handling of large files.
- Designed scalable APIs ensuring performance, reliability, and seamless integration.
- Managed end-to-end development including architecture, deployment, and optimization

EDUCATION

Bachelor of Technology

SRM Madurai College For Engineering And Technology • Sivagangai,Tamilnadu • 2028

HSC-Higher Secondary

Seventh Day Adventist Matriculation Higher Secondary School • Madurai,Tamil Nadu • 2024

INVOLVEMENT

Founder & Community Lead

Silent Finishers — Peer Tech Community • November 2025 – Present

- Founded and lead Silent Finishers, a peer tech community focused on collaborative project building, hackathon participation, and shared learning among aspiring developers.
- Coordinated team members across AI, full-stack, and data domains — assigning tasks based on individual strengths to deliver real-world projects.
- Participated in hackathon challenges as a team, developing rapid prototyping and competitive problem-solving skills under time pressure.
- Curated and distributed learning resources consistently across the community, building a strong knowledge-sharing culture.
- Documented the team’s project journey on LinkedIn under #SilentFinishers, growing a professional brand presence in the tech community.

App Developer

SRM Madurai College For Engineering And Technology • August 2025 – Present

- Designed and developed the **SRM Relay** internal communication system using Python, Django, and Streamlit, improving information flow across departments.
- Built full-stack features including role-based access control, secure authentication, and structured data management for college-level tools.
- Collaborated with faculty and student teams to gather requirements, iterate on UI/UX, and deliver functional app modules.
- Handled end-to-end development lifecycle — from planning and coding to testing, debugging, and deployment.
- Documented and demonstrated app features during college-level evaluations, receiving practical exposure to real product delivery.

SKILLS

Programming & Web Development: Python, SQL, Django, Streamlit, REST APIs, Responsive Web Design

AI & Machine Learning: Machine Learning (scikit-learn), Data Preprocessing, Feature Engineering, Model Evaluation, AI Automation

Data Science & Analytics: Pandas, NumPy, Data Visualization (Matplotlib, Seaborn), Power BI, Data Cleaning & Analysis

App & UI Development: Streamlit Apps, Web Apps, Android (Basic), UI/UX Design Fundamentals

Soft Skills: Problem Solving, Fast Learning, Communication, Teamwork
